### **ABOUT THE PHILIPPINE DISASTER RESILIENCE FOUNDATION**

The Philippine Disaster Resilience Foundation (PDRF) is the country's major private sector vehicle and coordinator for disaster risk reduction & management. Composed of a team of highly committed professionals, PDRF works with field experts and reputable humanitarian institutions to organize and coordinate private sector solutions to disaster management. As the critical link among government agencies, civil society groups and local government units, PDRF provides a systematic and holistic approach in responding to different crises from the period of preparedness to recovery.

Backed by the country's largest conglomerates, industry movers and top corporate leaders, PDRF is an embodiment of solidarity that transcends business competition and promotes the common vision to build a strong, resilient and disaster-ready Philippines.

The PDRF Emergency Operations Center is a purpose-built facility organized and operated for emergency preparedness and response in times of disasters and used for capability building of the PDRF network for disaster resiliency. It is composed of multi-disciplinary talents from the PDRF and its network. Having a national scope, the PDRF EOC establishes strategic coordination with other EOCs of the private sector and government and tactical coordination with their respective Incident Command Posts during emergencies

The key processes of the PDRF EOC are the following:

- A. Information Management for Disaster Risk Reduction and Resilience
  - a. Hazard monitoring, collection, processing, analysis and dissemination of disaster risk reduction information to support EOC teams and DRR stakeholders in their respective roles.
- B. Emergency Response Preparedness

- a. Measures and Actions that foresee emergencies that are likely to occur and pre-plan key components of a response. Though plans will need to be revised if the event happens, preparedness makes it possible to respond faster, more appropriately and efficiently, and to make decisions on the basis of more reliable information.
- C. Emergency Response
  - a. Immediate decisions and measures to (1) contain or mitigate the effects of a disastrous event to prevent any further loss of life and/or property, (2) restore order in its immediate aftermath, and (3) re-establish normality through reconstruction and re-rehabilitation shortly thereafter.
- D. Cluster Coordination for Response
  - a. Coordinative and definitive activities to strengthen system-wide preparedness and technical capacity to respond to humanitarian emergencies and provide clear leadership and accountability in the main areas of humanitarian response.
