

Public Service Continuity

In partnership with the Office of Civil Defense and the Department of the Interior and Local Government, PDRF provides technical assistance in establishing public service continuity programs for national government agencies and local government units. Through PDRF's intervention, a standard Public Service Continuity Plan format has been developed for all government agencies and local government units. This is to ensure continuity of the essential functions of the government even during disasters.

In 2018, twelve public service continuity planning activities were held, building the capacity of over twenty government agencies including all nineteen NDRRMC agency members.
